

To restart the Firebird service on a **server**, you will need to be able to log into your server (contact your IT company if you don't have the login information/permission to do this)

- Log all other machines out of TSS and EventCAD
- Go into your **Task Manager** and select **Services**
- Find **Firebird Guardian** from the list
- Right Click on Firebird Guardian and select **STOP**
- Right Click again on Firebird Guardian and select **START** to restart it
